CardText

The organizations and individuals listed in this directory cannot and do not guarantee that they can provide assistance, but each of us are "committed" to doing everything within our charters and organizations, bylaws, governing Federal-State-Local laws and rules-regulations, and resolve to do whatever we can that is legal, moral, and ethical and within in our resources and approvals processes to help those in need. Everyone and every organization in this directory is devoted to trying to help our beloved wounded, ill, injured, and needy troops and disabled veterans, veterans, and their families. Although most of the services in this directory are free, some are not free. For example (and just one example) there are some co-pays for medications under hospice for Medicare covered hospice patients. However, all the organizations and individuals listed here are committed to help in every way possible and to make sure if there are any fees associated with their assistance that they are fully disclosed up front and before there are any charges accrued.
